## **Kamdhenu Limited looks to enhance structural steel market**

**Ahemdabad,**

Bracketed among the leading manufacturers of TMT bars and structural steel, Kamdhenu Limited has been growing its market presence continuously. The company has grown from 'one of them' to 'one of the best,' and has been making dynamic progress with an intention of growing bigger but together over a period of time. Strengthening its market position in Gujarat, the company has introduced its high quality structural steel products in the state on a vast level. Kamdhenu Limited is one of major manufacturers and suppliers in Gujarat (Ahemdabad) where it has been operating through its franchisee partner companies. Structural steels are long steel products with cross section of various snoopers like I-Beam, Angle, round, square and flat. They are widely used in small as well as construction projects. Structural steel channels are applied in the construction of tunnels,

transmission towers, factory structures, bridges, railways, power plants, petro-chemical projects, industrial sheds, refineries & other infrastructural projects.

Mr. Sunil Agarwal, Director of Kamdhenu Ltd, has stated that Gujarat is ranked among the top most markets for the company where it has come up with its advanced grades of structural steel for the customers. Being a BIS license-holder Kamdhenu Limited adheres to all set standards of quality. Kamdhenu structural steel products are being supplied on a large scale.

Kamdhenu Ltd. is looking to supply its structural steel products all over Gujarat in near future. The Kamdhenu manufacturing plants are equipped with the latest technology to ensure higher productivity with standard quality. Through the advanced grade structural steel products, the company is poised to capture greater market share in the country and Gujarat in particular.
