## SCRAPPER (CLEANER) FOR BELT CONVEYOR

### V PLOW TYPE INTERNAL SCRAPPER

We offer Conveyor Belt Scraper. External Cleaning of belt conveyors at the discharge end is necessary for good house keeping and material recovery Scrapers are installed at the head end to avoid carry over of the material on the return belt side. Similarly, Internal cleaning of the belt before the tail pulley is needed to avoid material being carried between the belt and the tail pulley.

### EXTERNAL SCRAPPER

- Prevents rogue material from entering drum
- Protects belt, tail drum and take-up pulleys
- Eliminates side belt damage
- Improves belt tracking
- Suitable from reversible operation
- Ease of installation
- Minimum maintenance
- Ensures removal of material adhering to return stand
